COMMUNITY PARAMEDIC
Healthcare Provider Taxonomy Code Set

The Healthcare Provider Taxonomy Code Set is a hierarchical code set that consists of codes, descriptions, and definitions. Healthcare Provider Taxonomy Codes are designed to categorize the type, classification, and/or specialization of health care providers.

146E00000X Community Paramedic

- 2 -

Taxonomy Code	146E00000X
Status	Active
Level	Level II Classification
Short Name	Community Paramedic
Full Name	Community Paramedic
Level I, Provider Grouping	Emergency Medical Service Providers
Level II, Classification	Community Paramedic
Description	A Community Paramedic is trained in responding to a scene and arranging appointments and transportation to alternate destinations through established partnerships or direct field communication. Alternative destinations for patient care include walk-in clinics, detox facilities, shelters and homeless services, and in-home assistance services. Services provided by community paramedics include, but are not limited to, completing blood glucose checks, vital signs, blood draws, and other treatments for the purpose of assessing and reporting to the referring physician and providing in-home evaluation of high-risk patients following hospital discharge.
Additional Information	Source: National Uniform Claim Committee, www.nucc.org

The Healthcare Provider Taxonomy Code Set is a hierarchical code set that consists of codes, descriptions, and definitions. That Code Set is available from the Washington Publishing Company. The Code Set is maintained by the National Uniform Claim Committee. The Code Set is a Health Insurance Portability and Accountability (HIPAA) standard code set. As such, it is the only code set that may be used in HIPAA standard transactions to report the type/classification/specialization of a health care provider when such reporting is required.
