INTERPRETER
Healthcare Provider Taxonomy Code Set

The Healthcare Provider Taxonomy Code Set is a hierarchical code set that consists of codes, descriptions, and definitions. Healthcare Provider Taxonomy Codes are designed to categorize the type, classification, and/or specialization of health care providers.

171R00000X Interpreter

<i>Taxonomy Code</i>	171R00000X
<i>Status</i>	Active
<i>Level</i>	Level II Classification
<i>Short Name</i>	Interpreter
<i>Full Name</i>	Interpreter
<i>Level I, Provider Grouping</i>	Other Service Providers
<i>Level II, Classification</i>	Interpreter
<i>Description</i>	An Interpreter is a person who translates oral communication between two or more people. This includes translating from one language to another or interpreting sign language. An interpreter is necessary for medical care when the patient does not speak the language of the health care provider or when the patient has a disability involving spoken language.
<i>Additional Information</i>	Source: National Medicaid EDI HIPAA NPI Sub Work Group [7/1/2006: new]

The Healthcare Provider Taxonomy Code Set is a hierarchical code set that consists of codes, descriptions, and definitions. That Code Set is available from the Washington Publishing Company. The Code Set is maintained by the National Uniform Claim Committee. The Code Set is a Health Insurance Portability and Accountability (HIPAA) standard code set. As such, it is the only code set that may be used in HIPAA standard transactions to report the type/classification/specialization of a health care provider when such reporting is required.
