National Drug Code Directory

The Drug Listing Act of 1972 requires registered drug establishments to provide the Food and Drug Administration (FDA) with a current list of all drugs manufactured, prepared, propagated, compounded, or processed by it for commercial distribution. (See Section 510 of the Federal Food, Drug, and Cosmetic Act (Act) (21 U.S.C. § 360)). Drug products are identified and reported using a unique, three-segment number, called the National Drug Code (NDC), which serves as a universal product identifier for drugs. FDA publishes the listed NDC numbers and the information submitted as part of the listing information in the NDC Directory which is updated daily.

43742-0738-1

Labeler Name	Deseret Biologicals, Inc.	Name of Company corresponding to the labeler code segment of the ProductNDC.
NDC Package Code	43742-0738-1	The labeler code, product code, and package code segments of the National Drug Code number, separated by hyphens. Asterisks are no longer used or included within the product and package code segments to indicate certain configurations of the NDC.
11 Digit NDC Code	43742-0738-01	It should be noted that many NDCs are displayed on drug packaging in a 10-digit format. Proper billing of an NDC requires an 11-digit number in a 5-4-2 format. Converting NDCs from a 10-digit to 11-digit format requires a strategically placed zero, dependent upon the 10-digit format.
Product NDC	43742-0738	The labeler code and product code segments of the National Drug Code number, separated by a hyphen. Asterisks are no longer used or included within the product code segment to indicate certain configurations of the NDC.
Product Type Name	DRUG FOR FURTHER PROCESSING	Indicates the type of product, such as Human Prescription Drug or Human OTC Drug. This data element corresponds to the “Document Type” of the SPL submission for the listing. The complete list of codes and translations can be found at www.fda.gov/edrls under Structured Product Labeling Resources.
Non Proprietary Name	Hepar Suis, Bamboo, Barley, Poppy Seed, Corn, Flax Seed, Cotton Seed, Millet, Milo, Oat, Rice, Rye, Safflower, Sesame, Sorghum, Soy Bean, Sugarcane, Sunflower, Wheat, Coffea Tosta, Thea Sinensis, Carbo Vegetabilis, Ferrum Iodatum, Ferrum Metallicum, Gelsemium Sempervirens, Iodium, Lycopodium Clavatum, Pulsatilla (vulgaris), Selenium Metallicum, Zincum Metallicum, Allium Cepa, Amygdala Amara, Anacardium Occidentale, Arachis Hypogea, Beef, Bertholletia Exceisa, Carya Illinoinensis, Cheese, Chicken,	Sometimes called the generic name, this is usually the active ingredient(s) of the product.
Package Description	960 mL in 1 BOTTLE, PLASTIC (43742-0738-1)	A description of the size and type of packaging in sentence form. Multilevel packages will have the descriptions concatenated together. For example: 4 BOTTLES in 1 CARTON/100 TABLETS in 1 BOTTLE.

Marketing Category Name	DRUG FOR FURTHER PROCESSING	Product types are broken down into several potential Marketing Categories, such as NDA/ANDA/BLA, OTC Monograph, or Unapproved Drug. One and only one Marketing Category may be chosen for a product, not all marketing categories are available to all product types. Currently, only final marketed product categories are included. The complete list of codes and translations can be found at www.fda.gov/edrls under Structured Product Labeling Resources.
Product Marketing Start Date	20170320	This is the date that the labeler indicates was the start of its marketing of the drug product.
Product Marketing End Date	20231229	This is the date the product will no longer be available on the market. If a product is no longer being manufactured, in most cases, the FDA recommends firms use the expiration date of the last lot produced as the EndMarketingDate, to reflect the potential for drug product to remain available after manufacturing has ceased. Products that are the subject of ongoing manufacturing will not ordinarily have any EndMarketingDate. Products with a value in the EndMarketingDate will be removed from the NDC Directory when the EndMarketingDate is reached.
Dosage Form Name	LIQUID	The translation of the DosageForm Code submitted by the firm. The complete list of codes and translations can be found www.fda.gov/edrls under Structured Product Labeling Resources.

DEA Schedule	CII	Schedules of Controlled Substances This is the assigned DEA Schedule number as reported by the labeler. Values are CI, CII, CIII, CIV, and CV. The CSA places each controlled substance—drug or other substance—into one of five schedules based on the substance's medical use, potential for abuse, and safety or dependence liability. The Act also allows substance to be added to or removed from a schedule, and to be rescheduled or transferred from one schedule to another. The basis upon which substances are placed into each of the five schedules is explained below, and examples of drugs' or other substances within the schedules are listed.

Status	Deprecated	Possible status values: - Active Active NDC Code - Deprecated Deprecated NDC Code Unfinished (Unapproved) The following status describes submitted unfinished drugs, including the marketing categories of Active Pharmaceutical Ingredient (API), Drug for Further Processing, Bulk for Human Drug Compounding, and Bulk for Animal Drug Compounding. FDA does not review and approve unfinished products. Therefore, all products having "unfinished" status are considered unapproved.
Last Update Date	2014-02-04	The date that a record was last updated or changed.
